VISION

With our range of products, we are specifically focusing on the ecological aspects connected to a new lifestyle, where the outdoors symbolize being in touch with nature, where boundaries disappear and change. Our systems, working with renewable energy sources, are a valid answer to the need to preserve the world that we share with all living beings, to respect it and to keep it untouched.

MISSION

The legacy we have been carrying on for over thirty years is a centuries-old tradition, strongly connected to the Earth and its bounty. Our mission is loyal to the spirit of cultivating, ploughing, manuring, watering, and harvesting. Faithful to our model, we cultivate human relationships and coordinate production with harvest seasons – just as it happens in nature. This modus operandi helped us to create a design tailored to evolving markets, and consolidating an organic, consistent set of corporate ethics that creates value and opportunity.

ARCADIA-K

PERGOLA WITH SLACK FABRIC

A R C A D I A

The pergola with a manually operated sliding cover represents a timeless classic, the perfect fusion of form and function. Arcadia's minimal design, with essential lines, seamlessly blends with the surrounding environment, creating a space where landscape and architecture converge to ensure maximum comfort and relaxation.

Arcadia-K is the version with integrated perimeter guttering that channels rainwater inside the uprights, providing high protection against rain.

The presence of the cover and the gutter profile allows the installation of various types of walls in addition to the VOK wall, ranging from sliding ZIP walls to elegant glass walls. The warm color range and the matte finish of thermosetting epoxy powder coatings, oven-cured, enhance the product's quality and resistance to the effects of time, giving Arcadia a more welcoming appearance in harmony with natural elements.

The structure can be complemented with numerous accessories, such as the integrated LED light kit on the rafters, providing uniform and functional lighting to the entire space below.

Arcadia can be completed with a self-leveling floor composed of an aluminum frame and a choice of finish. The Horizon flooring can be weighted, eliminating the need for ground anchors.
