K U B E

## **VISION**

With our range of products, we are specifically focusing on the ecological aspects connected to a new lifestyle, where the outdoors symbolize being in touch with nature, where boundaries disappear and change. Our systems, working with renewable energy sources, are a valid answer to the need to preserve the world that we share with all living beings, to respect it and to keep it untouched.

## **MISSION**

The legacy we have been carrying on for over thirty years is a centuries-old tradition, strongly connected to the Earth and its bounty. Our mission is loyal to the spirit of cultivating, ploughing, manuring, watering, and harvesting. Faithful to our model, we cultivate human relationships and coordinate production with harvest seasons – just as it happens in nature. This modus operandi helped us to create a design tailored to evolving markets, and consolidating an organic, consistent set of corporate ethics that creates value and opportunity.

## PERGOLA WITH INTERLACED ROOF

K U-B E

Kube can be defined as the nexus between contemporary design and the archetype of a house – the simplicity of a hut, built with intertwined elements that recall the most natural shading systems, made of branches and twigs.

The structure is a trellis criss-crossed by PVC tarps, its alternating movement breaking the monotony of plain surfaces and offering glimpses of the sky through the interweaving.

The structure can be complemented with a number of accessories such as curtains, decorative drapes, and telescopic windshields in glass. At night Kube fully manifests its beauty, thanks to the LED lights built into the perimeter beams that create a cozy and intimate atmosphere.

Kube represents a stylistic exercise, typical of strategic design. While designing it, we wanted to catch glimpses of life through perceptive and environmental features. Kube's formal and dimensional diversity shows itself through the heterogeneous heights and the volumetric modular construction – a signature feature that becomes a means of urban and residential regeneration. The goal is to connect parts of the building or of the botanical surroundings to the pergola, becoming thus the unifying element of the space. Kube harmonizes with any kind of surrounding, giving the chance to have a panoramic vision of space that multiplies the different perceptions of harmonic beauty.

## WARRANTY AND QUALITY

- The products are CE certified. The booklet with the Declaration of Performance (DOP) accompanies the product until its installation is completed.
- Fireproofing certificates are supplied for each type of tarp.
- The structures are structurally tested and comply with the loads required by current legislations, DM 17 January 2018 Technical Standards for Buildings (Norme Tecniche per le Costruzioni) NTC 2018 and UNI EN 1991
- The structural elements made of aluminum are covered by a 5-year guarantee\*
- Since 1990, we design and industrialize our collections completely in Italy, at the Poggio Renatico plants.

\* For further details about the warranty please see the terms and conditions of sale Giulio Barbieri S.r.l. indicated in the official price list.
