O N D A

VISION

With our range of products, we are specifically focusing on the ecological aspects connected to a new lifestyle, where the outdoors symbolize being in touch with nature, where boundaries disappear and change. Our systems, working with renewable energy sources, are a valid answer to the need to preserve the world that we share with all living beings, to respect it and to keep it untouched.

MISSION

The legacy we have been carrying on for over thirty years is a centuries-old tradition, strongly connected to the Earth and its bounty. Our mission is loyal to the spirit of cultivating, ploughing, manuring, watering, and harvesting. Faithful to our model, we cultivate human relationships and coordinate production with harvest seasons – just as it happens in nature. This modus operandi helped us to create a design tailored to evolving markets, and consolidating an organic, consistent set of corporate ethics that creates value and opportunity.

PERGOLA WITH RETRACTABLE AWNING

O N D A

Onda is a freestanding or wall mounted pergola with a manually-operated sliding tarp cover. Its design is all about simplicity, in each and every detail: the result is a contemporary pergola that suits walls with perimetric openings. Establishing a strong and stable relation between indoor and outdoor spaces and offering a pleasant space for comfort and relaxation, Onda is the link between landscape and architecture. The warm colors and the mat finish, hoven painted with high resistance epoxy powder, improve the Onda's resistance in time and make it a cozy-looking product, that sits in harmony with nature and the outdoors. The structure can be complemented with a number of accessories, such as the sliding edging profiles with PVC or glass membranes, curtains, telescopic windshields made of glass, a LED lighting kit, and decorative drapes.

YEAR
2022

Onda represents the perfect symbiosis between structural elements and outdoor spaces. The pitched cover made with a PVC membrane can be expanded, thanks to a modular system that finds no limit in space. The thought behind the design comes from the need to reduce complexity in favor of a simplification of the whole system.

Onda is a very manageable structure, thanks to its intuitive simplicity. The sophistication of the volumes, of the materials and of the chromatisms blends into new, minimal shapes – thanks to them, any architectural design absorbs Onda's timeless style, making the volumes and the structural elements impalpable, promoting simplicity, and acquiring a complex and advanced design.
