VISION

With our range of products, we are specifically focusing on the ecological aspects connected to a new lifestyle, where the outdoors symbolize being in touch with nature, where boundaries disappear and change. Our systems, working with renewable energy sources, are a valid answer to the need to preserve the world that we share with all living beings, to respect it and to keep it untouched.

MISSION

The legacy we have been carrying on for over thirty years is a centuries-old tradition, strongly connected to the Earth and its bounty. Our mission is loyal to the spirit of cultivating, ploughing, manuring, watering, and harvesting. Faithful to our model, we cultivate human relationships and coordinate production with harvest seasons – just as it happens in nature. This modus operandi helped us to create a design tailored to evolving markets, and consolidating an organic, consistent set of corporate ethics that creates value and opportunity.

MINIMALIST SHADE SAIL

V E L O R A

Velora is a shading sail, dedicated to those who love sailing-inspired designs – the winches and the stoppers used for the manual rewinding of both triangular sails and the inclined aluminum pillars with an elliptical section give the structure the dynamic and high-tech feel of a sail boat. Velora has a central roller with a spring-assisted rewinding system, facilitating the manual opening and closure of the sails. The structure can be installed anywhere in a very short time, even without preparing a foundation, thanks to an elegant ballast in white stone grit. Telescopic windshields in glass can be installed on Velora to create a shielded area to enjoy the outdoors.

Velora, a design between art and science, at the edge between remembrance and invention.

Velora has the courage of modernity and the prudence and tradition, awakening emotions that arise from the circular process of designing and creating, coming back to the original idea.

Velora mixes styles and disciplines, includes similarities without modifying the territory, but melting with it, making it cozy and pleasant.
